Patient ID:	61528	Patient Name:	GOVIND SINGH PAPPA SINGH
Age:	24 Years	Sex:	MALE
Study Date:	09-11-2022	Modality:	ULTRASOUND
		Study:	KUB

USG KUB

CLINICAL HISTORY: Haematuria on/off-02 weeks

FINDINGS:

Both kidneys are normal in size, shape and parenchymal echotexture. No ofhydronephrosis is seen in either kidney.

Parenchymal echotexture is normal and the corticomedullary differentiation is maintained.

Right kidney measures-9.81 x 4.12 cms (PT-1.30 cm)

Small 5 mm sized echogenic non-shadowing foci noted in sinus region

Left kidney measures – 11.15 x 5.28cms. (PT-0.97 cm)

Multiple small 5-6 mm sized echogenic non-shadowing foci noted in sinus region

Bladder is optimally distended (265 ml), no intravesical calculus or mass lesion seen.

Both ureteric jets seen

Prostate is normal size, measures 16.5 cc volume. Seminal vesicles appear normal.

No free fluid seen in the abdomen and pelvis.

IMPRESSION:

Multiple bilateral renal concretions; need clinical and Lab data correlation
