Interpretation Notes :

Result Interpretation and Recommendations

Detected If the result is detected, that means the sample is positive for SARS-CoV-2/Covid-19
 Not Detected If the result is not detected, that means the sample is negative for SARS-CoV-2/Covid-19.
 Presumptive Positive Only one of the multiple genes is detected or a low viral load is possible. Request for repeat sample in 72-96 hours.

The false-negative result with clinical symptoms may be caused by

- Unsuitable collection, handling, and/or storage of samples.
- Sample outside of the viremic phase.

We recommend repeating testing on a fresh sample

LIMITATION OF THE TEST

- This assay has been validated for use with an oropharyngeal swab and nasopharyngeal swab samples only.
- This assay only detects RdRp, N gene, and E gene.
- This test cannot rule out diseases caused by other pathogens.
