**Lab. No.** : 3023127854  
**Contract.** : Nas (WN, VN) 20% - Dubai Branch  
**Patient No.** : 30-89615  
**File No.** : 39496  
**Sample Date** : 21/02/2023 15:16 PM  
**Report Date** : 22/02/2023 09:31 AM  
**Doctor references** : Dr. Tahniyat Iqbal

**Branch** : Al Borg Lab. Dubai Deirah  
**Age** : 40 Year  
**DOB** 10/06/1983  
**Sex** : Female

### MISC. Unit

| Test                        | Result | Unit  | Ref. Range                                                                                                                                 | Lab |
|-----------------------------|--------|-------|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Troponin T High - Sensitive | 5.2    | pg/ml | The upper reference limit (99th percentile) for troponin T was determined at 14ng/L (pg/mL), 95% confidence interval 12.7-24.9ng/L (pg/mL) | BUH |

### Comments

Sample Type: Serum/ EDTA Plasma  
 Methodology: ECLIA (Electrochemiluminescence Immunoassay)

Note: Update in Reference Range

- High-sensitive troponin assay is used to detect minute amounts of troponin T allowing early detection of myocardial infarction as early as one hour. Roche, Cobas E 411 assay has CV less than 10% at 99th percentile.
- Single troponin T result may not be sufficient to evaluate Myocardial infarction, conditions resulting in myocardial injury (like heart failure, myocarditis, arrhythmias), renal insufficiency or pulmonary embolism can increase troponin level as well.
