

LABORATORY REPORT

Name : **SNEHA RAJARAM RAJARAM ADIYERI CHANOLYAN** File. No. : **AAL02-327389**
DOB/Gender : **23-10-1979 (43 Yrs 8 Month 19 Days/Female)** Referral Doctor : **Dr. Enomen Goodluck Ekata**
Lab No. : **22231920438** Referral Clinic : **Peshawar(Irham Medical Center)**
Request Date : **11-07-2023 20:40** Clinic File No : **40466**
Insurance : **No**

COAGULATION

Test Name	Result	Units	Ref. Range	Method
*D - Dimer	969.0^H	ng/mL	<500	Turbidimetry

Increased D'Dimer values are abnormal but do not indicate a specific disease state. D'dimer values may be increased as a result of clinical or subclinical DIC/ICF, recent surgery, bleeding, trauma, or thromboembolism or in association with pregnancy, liver disease, inflammation, malignancy, or hypercoagulable (procoagulant) states. The degree of D'Dimer increase does not definitely correlate with the clinical severity of associated disease states.

The concentrations for the entire group of pregnant women fell within the following ranges:

First Trimester 167-721 ng/mL

Second Trimester 298-1653 ng/mL

Third Trimester 483-2256 ng/mL

Kindly note new reference range for D Dimer effective from 21/2/2022.

Remarks:

Test result to be interpreted in the light of clinical history and to be investigated further if necessary.

Sample Type : Citrate Plasma

----- End Of Report -----

These tests are accredited under ISO 15189:2012 unless specified by (*)

Sample processed on the same day of receipt unless specified otherwise.

Test results pertain only to the sample tested and to be correlated with clinical history.

Reference range related to Age/Gender.
