CYTOLOGY

Path. No : C23-14988

Site : Cervix.

Number of container (s) : 1 Container.

Relevant Clinical Details :

LMP: 19/08/2023.

Gross Description :

Received one container of Thin prep fixative processed for LBC. One PAP stained smear is prepared.

Adequacy of Specimen :

PAP smear is adequate for evaluation with mixed pattern of superficial and intermediate squamous cells. Endocervical/transformation zone component present.

Interpretation :

- Negative for intraepithelial lesion or malignancy.

Reporting System :

Bethesda system for reporting cervical cytology, 2014.

Disclaimer :

The cervical cytology is a screening test primarily for cervical squamous cancer and its precursors, with inherent false negative and false positive results.

Transcribed by: Taheer Ahmed.
