

PRP CONSENT FORM

PRP (Platelet Rich Plasma) is a natural product derived from your own body used to help tissue heal and grow new cells. PRP is processed from a small sample of your blood to produce a plasma that is rich in platelets. The plasma is applied topically, injected or a combination of both to help the tissue heal and regenerate new cells for increased elasticity and improved skin tone. While lines and wrinkles soften and recede. The regenerative process resulting from PRP is used as an excellent combination treatment for acne and scar revision.
