

Patient ID : 411329985 **Reg. Date** : 28-Nov-2024 1:53 pm **Age/Sex** : 38 Years MALE
Patient : MR. KASSEM CHABAYTA **Printed** : 28-Nov-2024 8:13:38PM **Authenticated** : 28-Nov-2024 7:38 pm
Ref. Doctor : Dr. HUMAIRA MUMTAZ **Client** : SYMPHONY

ULTRASONOGRAPHY OF KUB

Findings:

- Right Kidney: Measures 11.7 x 6.1 cm. Cortical thickness 1.0 cm. It appears normal in size, shape & echotexture. No hydronephrosis or calculus seen.
- Left Kidney: Measures 9.9 x 6.1 cm. Cortical thickness 1.0 cm. 5 mm sized calculus in left lower ureter, causing mild left hydronephroureter. 20 x 19 mm sized simple cortical cyst (Bosniak type I) in mid pole of left kidney. Rest appears normal in size, shape & echotexture.
- Urinary Bladder: Well distended and normal in shape and contour. No intrinsic lesion or calculus seen in it. Bladder wall is of normal thickness. UVJ clear. Pre-void volume: 290 cc. Post-void residue: 11 cc.
- Prostate: Appears normal in size (volume 19 gm) and echotexture. Smooth and symmetric capsula. No focal lesions seen.
- No free fluid. No lymphadenopathy.

Ultrasound performed by Sonographer, Ms. Abijah Dela Peña and static images interpreted by Dr. Viral Vyas.

Impression:

- 5 mm sized calculus in left lower ureter, causing mild left hydronephroureter.
- 20 x 19 mm sized simple cortical cyst (Bosniak type I) in mid pole of left kidney.
- CT scan of KUB without contrast is suggested for further evaluation.

DR. VIRAL VYAS.
M.B.B.S, M.D
Specialist Radiologist.
