### IMMUNOLOGY

| Test                                | Result | Flag | Unit | Reference Range                                              | Methodology |
|-------------------------------------|--------|------|------|--------------------------------------------------------------|-------------|
| HIV I & II ANTIBODY AND P24 ANTIGEN | 0.2    |      | S/CO | Non-Reactive: <1.0<br>Reactive: =/>1.0<br>Source: Roche IFU. | ECLIA       |

#### INTERPRETATION NOTES :

1. A negative test result does not completely rule out the possibility of an infection with HIV. Serum or plasma samples from the very early (preseroconversion) phase or the late phase of HIV infection can occasionally yield negative findings. Yet unknown HIV variants can also lead to a negative HIV finding. The presence of antibodies to HIV is not a diagnosis of AIDS.
2. For diagnostic purposes, the results should always be assessed in conjunction with the patient's medical history, clinical examination and other findings.
3. This is a screening test.
