Your Health is our Priority

We Promise We Care

Date:24/08/2025	Patient Name: MOHAMMED MUMTAZ	Patient ID:43225
Gender: M	Age: 39Y	Ref Physician : DR. KEERTHANA

Abdominal and Pelvis Ultrasonography Examination

- The liver is normal in size with mild increased parenchymal echogenicity. Intrahepatic and extrahepatic biliary ducts are normal, no evidence of mass lesion.
Right lobe- 155mm (N= 120-160mm) Left lobe- 91mm (N= 100 mm)
- The gallbladder is well-distended and appears normal in size. No evidence of wall thickening, polyp, lithiasis or pericholecystic fluid collection.
- Pancreas is normal in size with homogenous parenchymal echotexture, no evidence of calcification, focal lesion or peripancreatic fluid collection.
- Spleen is normal in size with homogenous parenchymal echotexture, no evidence of mass lesion.
- Both kidneys are normal in location, size and parenchymal echogenicity. Cortico-medullary differentiation is preserved, perinephric planes appear normal, no evidence of mass lesion. The pelvicalyceal systems and ureters appear normal. There is a 4mm in size non-obstructive stone in the right kidney.
Right kidney- 103x39mm (cortex- 15mm)
Left kidney - 103x51mm (cortex-15mm)
- The urinary bladder wall thickness is normal, no evidence of diverticule or abnormal mass lesion in the wall and within the urinary bladder. No calculi seen.
Urinary bladder volume=205ml
Urinary bladder Post voiding volume=none
- The prostate gland is normal in size and volume (36x27x32mm, volume=17ml), no evidence of mass lesion.
- No evidence of free fluid within the abdominal cavity and pelvic region.
- Significant gaseous colonic distension covering the underlying organs.
- No evidence of bowel wall thickening, intussusceptions or any sign for acute appendicitis in this examination.

IMPRESSION:

- The liver is normal in size with mild increased parenchymal echogenicity (mild fatty infiltration).
- There is a 4mm in size non-obstructive stone in the right kidney.
- Significant gaseous colonic distension covering the underlying organs.

Please correlate with clinical and laboratory findings.
Thank you very much.
