Microbiology Unit

Test	Result	Ref. Range
Influenza A Antigen	Negative	Negative
Influenza B Antigen	Negative	Negative

Comments

Methodology: Chromatographic immunoassay for the differential and qualitative detection of influenza virus type A and type B antigens.

The results must be evaluated in conjunction with other clinical data available to the physician.

A Negative test result may occur if the level of antigen in the sample is below the detection limit of the test or from improper sample collection.

Negative test results are not intended to rule – out other non- influenza viral infection.
